

Ekosistēmu pakalpojumu domino

Katra domino kauliņa augšā ir redzams simbols, kas apzīmē kādu no ekosistēmu pakalpojumu 3 grupām (apgādes, regulācijas, kultūras).

Katra kauliņa apakšējā daļā ir kāds no ekosistēmu pakalpojumiem vai to indikatoriem.

Uzdevums ir savienot ekosistēmu pakalpojumu ar grupu, kuram tas vistuvāk pieder. Kauliņi ir veidoti tā, ka pareizi tos savienojot, visi kauliņi tiek izmantoti.

- Domino var spēlēt tā oriģinālajā formā, savienojot ekosistēmu pakalpojuma grupu (augšā) ar ekosistēmu pakalpojumu vai tā indikatoru (apakšā).
- To var spēlēt arī izdalot skolēniem pa kauliņam un lūdzot lai tie atrod pāriņi, ar kuru savu kauliņu iespējams savienot.
- Kā arī jebkādā citā formātā, radoša interpretācija!
